Elementary Differential Equations and Boundary Value

Calculus (from Latin calculus, literally 'small pebble', used for counting and calculations, as on an abacus) is the mathematical study of continuous change, in the same way that geometry is the study of shape and algebra is the study of generalizations of arithmetic operations.. It has two major branches, differential calculus (concerning instantaneous rates of change and slopes of curves ...

Online homework and grading tools for instructors and students that reinforce student learning through practice and instant feedback.

WebAssign

In mathematics, a system of linear equations (or linear system) is a collection of two or more linear equations involving the same set of variables. For example, $x + y = 1$, $x + y + z = 1$, $x + y + z = 1$ is a system of three equations in the three variables x , y , z . A solution to a linear system is an assignment of values to the variables such that all the equations are simultaneously satisfied.

courses a-to-z-index - Golden West College

I have a love/hate relationship with calculus: it demonstrates the beauty of math and the agony of math education. Calculus relates topics in an elegant, brain-bending manner. My closest analogy is Darwin's Theory of Evolution: once understood, you start seeing Nature in terms of survival. You ...
