In incremental learning, the student usually remembers 95% of his or her top priority material. That knowledge is relatively stable and lasts in student's memory as long as the process continues, and well beyond.

### **SuperMemo: Incremental learning - Super Memory: Forget**

The incremental learning derives its name from the incremental nature of the learning process. In incremental learning, all facets of knowledge receive a regular treatment, and there is a regular inflow of new knowledge that builds upon the past knowledge.

A false memory is a psychological phenomenon where a person recalls something that did not happen or differently from the way it happened. There is a growing body of evidence that false memories are created whenever memories are recalled. False memory is often considered for trauma victims including those of childhood sexual abuse. This phenomenon was initially investigated by psychological ...

The relationship between sleep and memory has been postulated and studied since at least the early 19th century. Memory, the cognitive process whereby experiences, learning and recognition are recalled, is a product of brain plasticity, the structural changes within synapses that create associations between stimuli. Stimuli are encoded within milliseconds; however, the long-term maintenance of ...
