In computer science and operations research, a genetic algorithm (GA) is a metaheuristic inspired by the process of natural selection that belongs to the larger class of evolutionary algorithms (EA). Genetic algorithms are commonly used to generate high-quality solutions to optimization and search problems by relying on bio-inspired operators such as mutation, crossover and selection.

Population genetics is a subfield of genetics that deals with genetic differences within and between populations, and is a part of evolutionary biology. Studies in this branch of biology examine such phenomena as adaptation, speciation, and population structure.. Population genetics was a vital ingredient in the emergence of the modern evolutionary synthesis.

Analysis of the patterns of the obesity epidemic in the past four decades is limited by the absence of representative data from different countries. 11 Nevertheless, the pattern by which obesity prevalence rises in particular populations seems predictable. In low-income and middle-income countries, groups of high socioeconomic status in urban areas tend to be the first to have high obesity ...
