Divide the stream length found in step 4 by the average time in step 6 to determine the average velocity of the stream. The velocity found in step 7 must be multiplied by a friction correction factor. Since the top of a

stream flows faster than the bottom due to friction against the stream bed, the friction correction factor evens out the flow.

Mountain areas cover 24% of the world's land surface (UNEP-WCMC 2002) and are home to 12% of the global human population (Huddleston and Ataman 2003), with a further 14% living in their immediate vicinity (Meybeck et al. 2001). All of the world's major rivers originate in mountains and more than half of the world's mountain areas
