1. Introduction. According to WWF (2016), the world is using the equivalent of 1.6 planets to support human activities. The finding highlights that there is a huge gap between natural resource supply and human demand. This also indicates that human beings need to live a more sustainable lifestyle (Mont et al., 2014), to ensure a sustainable living environment.

OECD Perspectives: Spain Policies for a sustainable recovery

The world could possibly reduce consumption down to a very basic level, but if population keeps growing, eventually that will not be enough. Even today many are living on a sub-sustainable level, due in part to an uneven distribution of resources, but also because, in many regions, population has outgrown essential resources for that region.
