Introduction 9. Multi-Carrier Spread Spectrum. Since 1993, various combinations of multi-carrier modulation with the spread spectrum technique have been introduced as multiple access schemes. It has been shown that multi-carrier spread spectrum (MC-SS) offers high spectral efficiency, robustness, and flexibility [31].

Abstract – We compare single user digital multi-carrier spread spectrum (MC-SS) modulation with direct sequence (DS) SS (with a modified implementation) in the presence of narrowband interference (NBI) and multipath fading.

Digital multi-carrier spread spectrum versus direct

This book discusses multi-carrier modulation and spread spectrum techniques, recognized as the most promising candidate modulation methods for the 4th generation (4G) of mobile communications systems.
