The hydrocarbon dew point is the temperature (at a given pressure) at which the hydrocarbon components of any hydrocarbon-rich gas mixture, such as natural gas, will start to condense out of the gaseous phase. It is often also referred to as the HDP or the HCDP. The maximum temperature at which such condensation takes place is called the cricondenthem. ...

In physics, natural units are physical units of measurement based only on universal physical constants. For example, the elementary charge  $e$  is a natural unit of electric charge, and the speed of light  $c$  is a natural unit of speed. A purely natural system of units has all of its units defined in this way, and usually such that the numerical values of the selected physical constants in terms of ...
