C++11 is a version of the standard for the programming language C++. It was approved by International Organization for Standardization (ISO) on 12 August 2011, replacing C++03, superseded by C++14 on 18 August 2014 and later, by C++17. The name follows the tradition of naming language versions by the publication year of the specification, though it was formerly named C++0x because it was ...

Intuition. Ordinary linear regression predicts the expected value of a given unknown quantity (the response variable, a random variable) as a linear combination of a set of observed values (predictors). This implies that a constant change in a predictor leads to a constant change in the response variable (i.e. a linear-response model). This is appropriate when the response variable has a normal ...

while  $\lim_{h \rightarrow 0} \hat{\beta} = \beta$ . Hence, the long-run generalized impulse responses in levels depend on the long-run impact matrix  $C$  and converge to a finite matrix, while the long-run generalized responses for the cointegration relations converge to zero.

In this section we will introduce logarithm functions. We give the basic properties and graphs of logarithm functions. In addition, we discuss how to evaluate some basic logarithms including the use of the change of base formula. We will also discuss the common logarithm,  $\log(x)$ , and the natural logarithm,  $\ln(x)$ .
