You can define multiple user directories in Confluence, so that Confluence looks in more than one place for its users and groups. For example, you could use the default Confluence internal directory and connect to an LDAP directory server. In that case, you can define the directory order to determine where Confluence looks first when processing users and groups.

Add and Invite Users - Atlassian Documentation

CQL (Confluence Query Language) is a query language developed for Confluence, which you can use in some macros and the Confluence search. Confluence search and CQL-powered macros allow you to add filters to build up a search query, adding as many filters as you need to narrow down the search results.
