Object-Oriented technology is both an evolution and a revolution As evolution it is the logical descendant of HLL, procedures, libraries, structured programming, and abstract data types.

### **OBJECT ORIENTED PROGRAMMING**

No programming language produces only correct results. No programmer should start each project from scratch. Object-oriented programming is the current cure-all " although it has been around for much more than ten years. At the core, there is little more to it than finally applying the good programming principles which we have been taught for
