Today, social scientists, natural scientists, engineers, computer scientists, educational researchers, and many others use observations as a primary research method. Observations can be conducted on nearly any subject matter, and the kinds of observations you will do depend on your research question.

Introduction to Primary Research: Observations, Surveys

Observations from the SCDA will be incorporated with observations from other detachment folds in order to guide the construction of the new more actualistic geometric and kinematic models. The SCDA is an open inclined fold at the headwaters of Straight Creek in Alaska's northeastern Brooks Range.

PRELIMINARY OBSERVATIONS OF THE STRAIGHT CREEK DETACHMENT

In order to use the regression model, the expression for a straight line is examined first. This is given in the next section. Following this is the formula for determining the regression line from the observed data. Following that, some examples of regression lines, and their interpretation, are given.
